

UPS Supply Chain Solutions

A global, multimodal transportation and logistics provider, UPS Supply Chain Solutions offers a full range of transportation and logistics services, including air freight, customs brokerage, expedited same-day services and warehousing.

The UPS guaranteed air freight rates are far lower than other guaranteed services for next day, second and economy services, and they come with a special 45 percent discount for enrolled NAM members. The result: the best, most reliable service in the industry—at considerable cost savings.

- Yes, as an NAM member, I want my company to save on freight services with UPS Supply Chain Solutions through the NAM's Freight Alliance Program™.**
